Test Equipment Solutions

Vibration Systems

1800 Vibration Test System

Lansmont's Model 1800 Vibration Test System was designed to meet the demands of a wide range of testing applications. From small products to pallet loads, the 1800 can be configured to handle them all. The 1800 features a rugged hydraulic actuator designed specifically for today's testing profiles, a reliable hydraulic power supply, and Lansmont's extremely popular TouchTest vibration control system. Let Lansmont help you configure a Model 1800 vibration test system that will meet your demands today!

1800 Features:

- Extremely versatile, the 1800 can be configured with table sizes from 25.6 in. (65 cm) to 60 in. square (152 cm) and handle payloads up to 2,800 lbs. (1,270 kg) with 1-G supports.
- Windows™ based vibration control system, including Lansmont's extremely powerful TouchTest Vibration software.
- Random vibration, swept-sine vibration, resonance search and dwell, repetitive bounce and powerful user-defined profiles all included.
- Fully integrated pump and servo controls, all designed and manufactured by the Lansmont Corporation.
- Field-to-Lab® ready. Simple transfer of data from your Lansmont SAVER™ to your vibration controller for real-world random vibration tests.
- Full range of applications training programs available.
- Worldwide Customer Service department.

Vibration Testing Benefits:

- Identify design and production defects.
- Increase product ruggedness.
- Reduce packaging costs.
- Eliminate shipping damage.

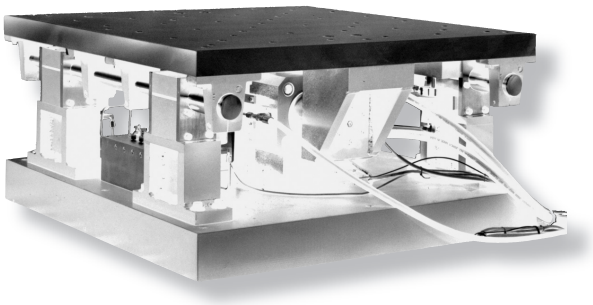
Test Equipment Vibration Systems Solutions

6000H Horizontal Vibration Test System



Do you have a need for horizontal vibration? The Lansmont Model 6000H Horizontal Vibration Test System is your solution! This system was designed to perform a wide range of horizontal vibration tests, including sine, random, and Field-to-Lab® protocols. From small products to pallet loads, this system can be configured to handle them all. The 6000H vibration system features a rugged hydraulic actuator designed specifically for today's testing profiles, a reliable hydraulic power supply, and Lansmont's extremely popular TouchTest vibration control system. The Model 6000H can also be configured to work with a vertical vibration system, sharing the hydraulic power supply and controls. This feature allows you the versatility of both a horizontal and vertical vibration test system without an investment in redundant power supplies and control systems. Let Lansmont help you configure a Model 6000H horizontal vibration test system that will meet your demands today!

6000H Horizontal Features:

- The 6000H horizontal vibration system has a table size of 36 in. square (91 cm) and has a piston stroke of 6 in. (15.2 cm), capable of handling payloads up to 3,000 lbs. (1,364 kg). Optional table sizes of 48 in. square (122 cm) and 60 in. square (152 cm) are available.
- Windows™ based vibration control system, including Lansmont's extremely powerful TouchTest Vibration software.
- Random vibration, swept-sine vibration, resonance search and dwell, as well as powerful user-defined profiles all included.
- Fully integrated pump and servo controls, all designed and manufactured by the Lansmont Corporation.
- Field-to-Lab® ready. Simple transfer of data from your Lansmont SAVER™ to your vibration controller for real-world random vibration tests.
- Full range of applications training programs available.
- Worldwide Customer Service department.

Vibration Testing Benefits:

- Identify design and production defects.
- Increase product ruggedness.
- Reduce packaging costs.
- Eliminate shipping damage.

6200 Vibration Test System

Lansmont's Model 6200 Vibration Test System was designed for product testing requiring a lot of stroke. This increased stroke allows a great deal of versatility when performing low frequency, high energy vibration test profiles which are becoming more and more common due to the increased implementation of Field-to-Lab® results in test protocols. The 6200 features a rugged hydraulic actuator designed specifically for today's testing profiles, a reliable hydraulic power supply, and Lansmont's extremely popular TouchTest™ Vibration Control System. Let Lansmont help you configure a Model 6200 vibration test system that will meet your demands today!

6200 Features:

- Extremely versatile, the 6200 can be configured with table sizes from 33.4 in. x 33.4 in. (85 cm x 85 cm) to 60 in. x 60 in. (152 cm x 152 cm). It has a piston stroke of 6 in. (15.2 cm) and handles payloads up to 2,000 lbs. (907 kg) without One-G supports and 3,000 lbs. (1361 kg) with One-G supports.
- Windows™ based vibration control system, including Lansmont's extremely powerful TouchTest™ Vibration software.
- Random vibration, swept-sine vibration, resonance search and dwell, repetitive bounce and powerful user defined profiles all included.
- Fully integrated pump and servo controls, all designed and manufactured by the Lansmont Corporation.
- Field-to-Lab® ready. Simple transfer of data from your Lansmont SAVER™ to your vibration controller for real-world random vibration tests.
- Global Customer Support offers professional services including repair, maintenance, calibration and training.

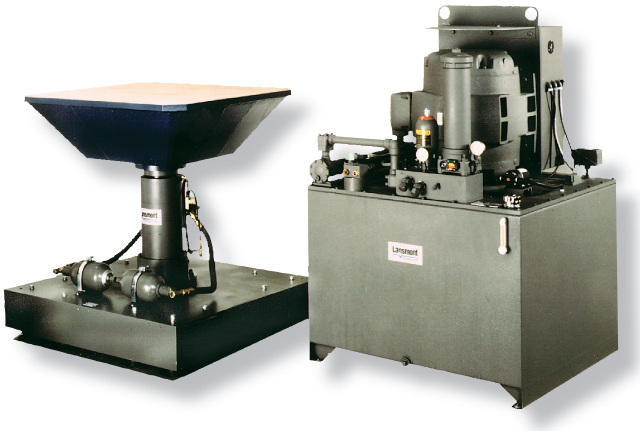
28000 Vibration Test System

The Lansmont Model 28000 Vibration Test System is the largest force system in our line of vibration equipment. This massive actuator, when combined with a high-performance servo-valve, high-flow hydraulic power supply and a 50 in. (127 cm) square Magnesium table, is capable of extremely high performance levels. Originally developed to accommodate payloads in excess of 1,000 lbs (454 kg) and perform to 500 Hz, this is the system to consider if your vibration testing requirements are non-standard and high performance. This system, when configured with a 36 in. (91.4 cm) Magnesium table, has demonstrated sinusoidal vibration sweeps to 1,000 Hz. The 28000 features a rugged hydraulic actuator designed specifically for high-performance testing profiles, a reliable hydraulic power supply, and Lansmont's extremely popular TouchTest vibration control system. Let Lansmont help you configure a Model 28000 vibration test system that will meet your demands today!



28000 Features:

- Extremely versatile, the 28000 can be configured with table sizes from 36 in. square (91.4 cm) to 60 in. square (152 cm). It has a piston stroke of 2.5 in. (6.4 cm) and can handle payloads up to 1000 lbs (454 kg).
- Windows™ based vibration control system, including Lansmont's extremely powerful TouchTest Vibration software.
